EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this Examiner's Amendment was given in a telephone interview with Atty. Jens Jenkins, Rick Nydegger, and David Todd on December 21 and 23, 2005.
3. The dependent claims are unchanged as the Amendment filed on May 03, 2005 (or Claims Appendix of the Appeal Brief filed October 11, 2005), independent claim 46 is cancelled, and other independent claims have been amended as follows:

1. (Currently Amended) In a device having a graphical user interface and a display capable of displaying video signals and chat communications in frames on the display in any of a plurality of selectable display modes, each of the display modes defining the relative positions and sizes of the display frames, a method comprising:

- receiving a video signal at the device;

- receiving at the device one or more chat communications corresponding to the video signal;

- displaying the video signal and the one or more chat communications on the display in a first display mode, such that the video signal is displayed in a first frame that has a corresponding size and position on the display, and such that the one or more chat communications are displayed in a second frame that has a corresponding size and position on the display;

- displaying in the second frame a link to a second display mode that is different than the first display mode, such that when the link to the second display mode is

selected, the second frame displays the one or more chat communications with at least one of a different frame size ~~and or~~ a different frame position than was used by the second frame in the first display mode, and while still displaying the video signal in the first frame; and

displaying a link to a third display mode within the second frame when the second frame is displayed in the second display mode, and such that when the link to the third display mode is selected, the second frame displays the one or more chat communications with at least one of a different frame size ~~and or~~ a different frame position than was used by the second frame in both the first and second display modes, and while still displaying the video signal in the first frame.

20. (Currently Amended) A device having a graphical user interface and a display capable of displaying video content and chat in a plurality of selectable display formats, each display format controlling the relative positions and sizes of the display frames for the video content and the chat, comprising:

means for displaying video and chat corresponding to the video in a first display mode, such that the video content is displayed in a first frame that has a corresponding size and position on the display, and such that the chat is displayed in a second frame that has a corresponding size and position on the display;

means for switching to a second display mode upon receiving a selection from a first link displayed in the second frame at the display, the second display mode being different than the first display mode, such that when the first link is selected, the means for switching to a second display mode includes means for switching at least one of the size ~~and or~~ position of the second frame, and while still displaying the chat and video signal in the first and second frames respectively; and

means for switching to a third display mode upon receiving a selection from a second link that is displayed in the second frame when the second frame is displayed in the second display mode, the third display mode being different than the first and second display modes, such that when the second link is selected, the means for switching to a ~~second third~~ display mode includes means for switching at least one of the size ~~and or~~

position of the second frame, and while still displaying the chat and video signal in the first and second frames respectively.
